

Mizo OS for steel manufacturing

One platform for your whole factory - sales, production, stock, people and finance

Where the day usually goes

Spreadsheets, WhatsApp groups, a separate accounting package and a lot of phone calls

Excel quotes

WhatsApp orders

**Whiteboard
production**

Paper delivery notes

**Separate
accounting**

Five places, five versions of the truth - and the full picture only at month end.

One platform, no silos

Every department works on the same record - from enquiry to cash

Mizo OS - one record, one platform, every department

Sales and quotations

Price per tonne by grade and diameter, delivery terms, credit limits, approval for discounts

The screenshot displays the Mizo OS interface for managing quotations. The left sidebar contains navigation options: Overview, Company Health, Assistant, Inbox, My coaching, Settings, PROCUREMENT (Procurement, Purchase Orders, Vendor Bills), OPERATIONS (Inventory, Overview), Demo Admin (ADMIN), Profile, My payslips, and Mizo OS — Patent Pending.

The main content area shows the 'Quotations' tab selected. The quotation title is 'TRIAL-Q-0004' for 'Desert Rose Interiors Co.' with a quotation date of 10/8/2026. The status is 'SENT', and the workflow shows 'DRAFT' → 'SENT' → 'ACCEPTED'. Action buttons include 'View quotation', 'Pro-forma', 'Send by email', 'Send on WhatsApp', 'Send for signature', 'Duplicate', and 'Delete'.

Customer details: Desert Rose Interiors Co. (with a 'Change customer' button). Salesperson: Unassigned (with an 'Update' button). A 'Convert to invoice' button is also present.

Below the quotation details is a 'Line items' table with the following columns: Description, Qty, Unit price, VAT, Line total, Cost, Margin, and Margin %.

On the right, there is an 'Attachments' section with an 'Attach a file' button and a message: 'No datasheets or supporting documents attached yet.'

Orders, dispatch and delivery

Delivery notes, truck loads and part deliveries tracked against each order

Production workflow, set up for your mill

Billets and scrap in - bundles out. Work orders, shifts, output and scrap per run

Work orders by shift - yield and scrap on every run

Procurement and imports

RFQs to suppliers, purchase orders, import duties and vendor bills in one flow

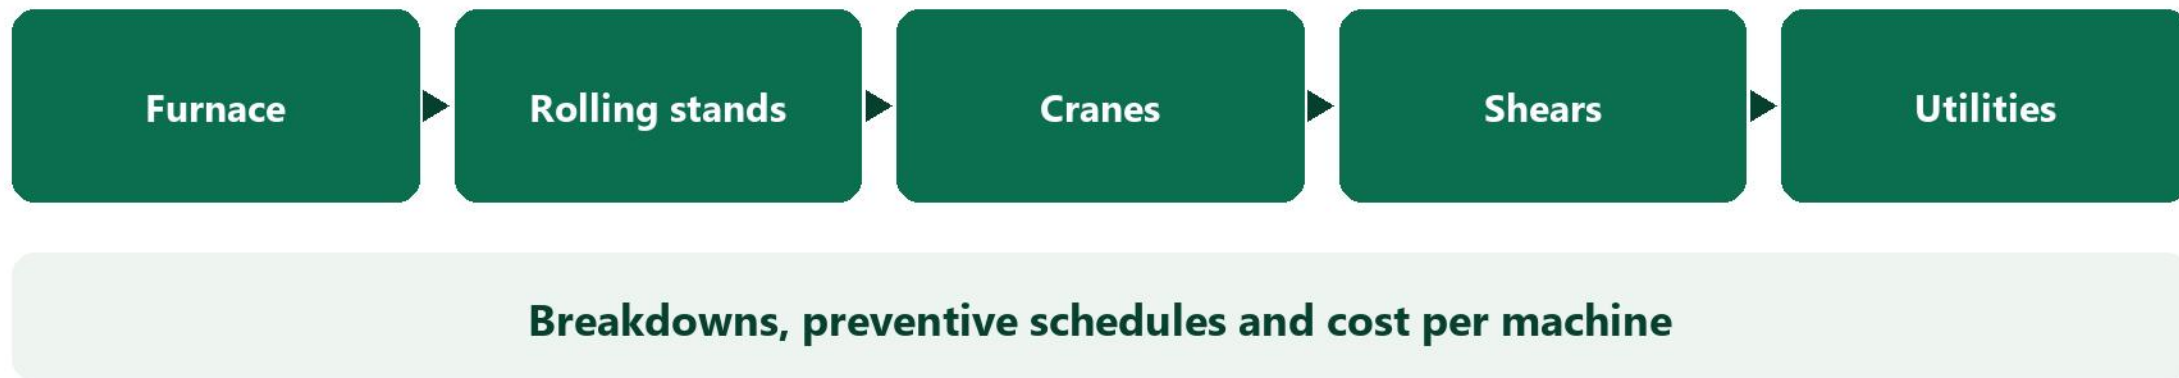

Stock you can trust

Raw material, work in progress and finished bars by size and grade, with heat numbers and mill certificates

Plant maintenance

Breakdowns and preventive schedules for the furnace, rolling stands, cranes and shears

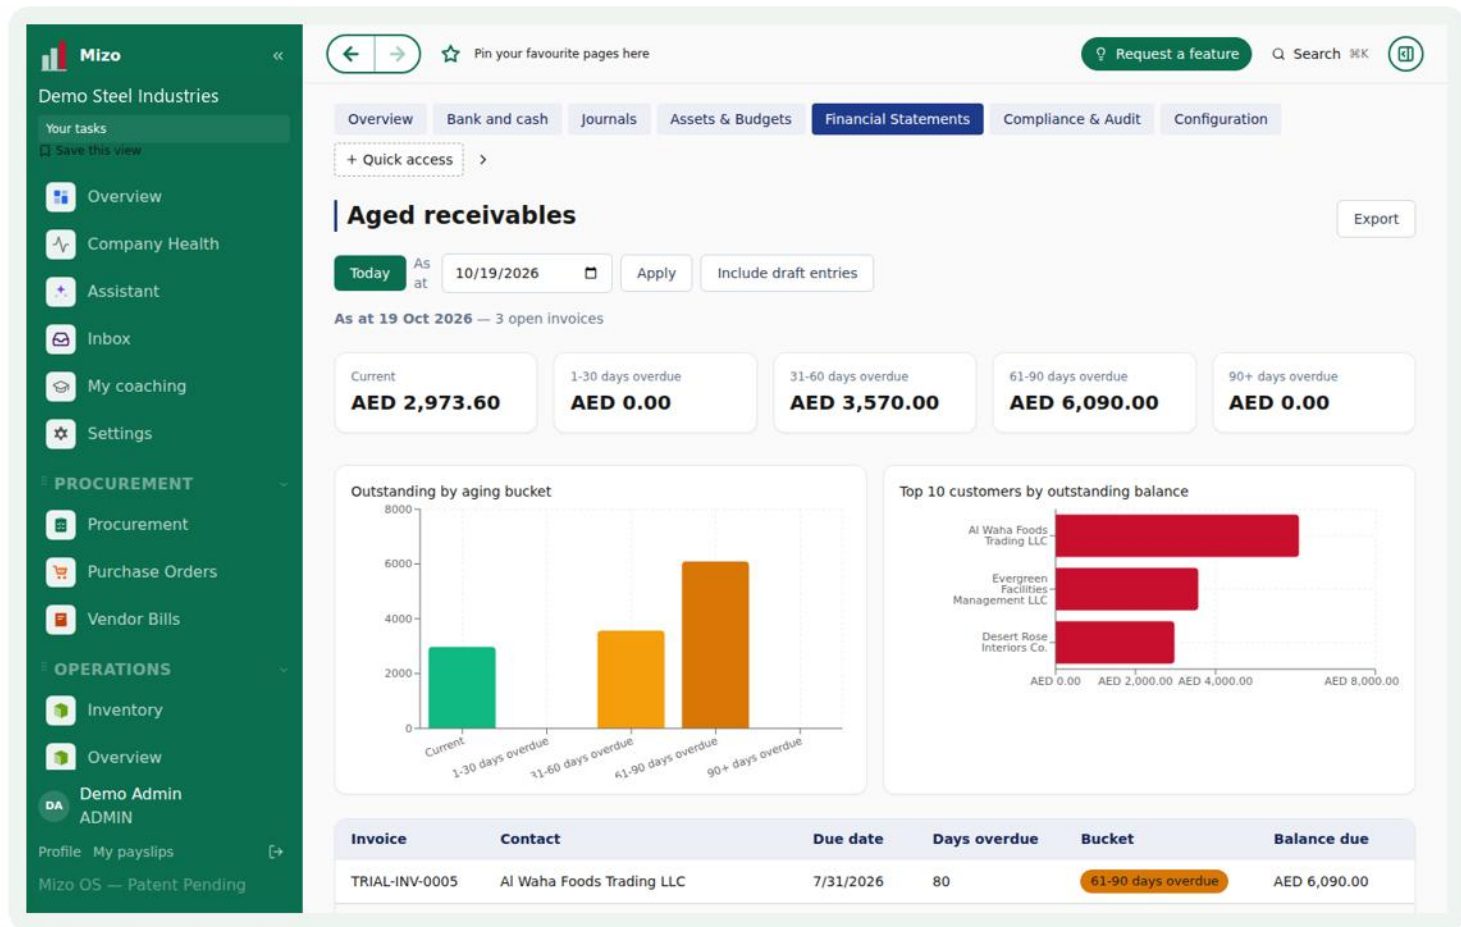

People, shifts and payroll

Attendance, shift rosters, overtime and payroll for factory and office staff

Finance that closes itself

VAT-ready invoicing, receivables, bank reconciliation and cost per tonne

Approvals and workflow management

The right person approves the right thing, on any device - nothing waits in someone's inbox

Each goes to the right person - desktop or the Mizo app, with reminders

Dashboards and Mizo AI

Live view of orders, output, stock and cash - and just ask in plain words

What to do next

- 1 invoice is 60+ days overdue — 6,090 outstanding. The oldest, TRIAL-INV-0005 to Al Waha Foods Trading LLC, is 80 days overdue.
- 1 invoice approaching 60 days overdue — Still inside the normal range, but worth a follow-up before they age further.
